

YASHADA ENTERPRISES

Precision Industrial Tapes & Electrical Components

ADHESIVE TAPE

Manufacturer and supplier of a wide range of industrial adhesive tapes including surface protection, foam gasket, anti-skid, security void, masking, tissue, and double-sided tapes.

Surface Protection Tape

Self-adhesive surface protection tape for safeguarding surfaces during manufacturing, transportation, and installation processes.

D Shape PU Foam Gasket

D-shaped polyurethane foam gasket tape for sealing, cushioning, and vibration dampening in electrical panels and enclosures.

Anti Skid Tapes

High-grip anti-skid adhesive tapes for slip-resistant surfaces in industrial, commercial, and residential applications.

Security Void Tape

Tamper-evident security void tape that reveals a hidden message when removed, used for packaging security and anti-theft applications.

Double Sided Tape

High-performance double-sided adhesive tape for permanent mounting, bonding, and assembly applications across industries.

Security Tape (Void Tape)

Security sealing tape with void pattern that provides tamper evidence for packaging and shipment protection.

Steel Grip Insulation Tape

Brand: Steelgrip

Premium quality Steel Grip brand PVC electrical insulation tape with excellent dielectric strength and moisture resistance.

Paper Masking Abro Tape

Brand: Abro

Abro brand crepe paper masking tape used in powder coating, carpentry jobs, painting, and surface protection applications.

PVC Insulation Tape

General-purpose PVC insulation tape for electrical wiring, harnessing, and colour coding of cables and connections.

Adhesive Foam Gasket

Self-adhesive closed-cell foam gasket for sealing and cushioning in electrical enclosures and industrial equipment.

Tissue Tape

Tissue-based adhesive tape for general mounting and bonding applications requiring thin, conformable tape.

Double Sided Tissue Tapes

Double-sided tissue-carrier adhesive tapes for lightweight bonding, mounting, and lamination applications.

CABLE LUGS

Supplier of aluminium and copper cable lugs for reliable electrical connections in power distribution and panel wiring systems.

Aluminium & Copper Lugs

Crimping type aluminium and copper cable lugs for power distribution connections, available in various sizes.

Copper Insulated Lugs

Insulated copper cable lugs with PVC insulation for safe and reliable electrical terminations.

SEALING TAPE

Cross filament and HDPE tarpaulin tapes for heavy-duty sealing, strapping, and packaging applications.

Cross Filament Tape

Reinforced cross-filament tape with glass fibre for heavy-duty carton sealing and strapping applications.

HDPE Tarpaulin Tape

HDPE tarpaulin tape for sealing and repairing tarpaulins, waterproof covering, and outdoor packaging.

PVC SLEEVES

Flexible PVC sleeves and white ferruling tubes for wire identification, bundling, and insulation protection.

PVC Sleeves

Flexible PVC sleeving for wire identification, bundling, and insulation protection in electrical panels.

White Ferruling Tube

White PVC ferruling tubes for wire end identification and marking in switchgear and control panels.

NYLON CABLE TIE

Self-locking nylon cable ties for secure wire bundling and cable management in industrial installations.

Nylon Cable Ties

High-quality nylon 6.6 self-locking cable ties available in various sizes for professional cable management.

DOOR HINGES

Spring panel hinges for electrical panel doors and industrial enclosure applications.

Spring Panel Hinges

Spring-loaded panel hinges for electrical panel doors, providing secure closure and easy access.

CABLE TRAY

PVC channels and cable ducts for organized cable routing inside electrical panels and enclosures.

PVC Channels (Cable Duct)

PVC wiring channels for organized cable routing inside electrical panels and control enclosures.

BRASS CABLE GLANDS

Brass cable glands with single and double compression for secure cable entry into enclosures with strain relief.

Double Compression Glands

Brass double compression cable glands for secure cable entry with superior strain relief and IP protection.

Cable Glands - S.C.

Single compression brass cable glands for standard cable entry applications in electrical enclosures.

SPIRAL SLEEVE

Spiral sleeves and busbar heat shrink sleeves for cable bundling, protection, and busbar insulation.

Busbar Sleeve (Heat Shrink Sleeve)

Heat-shrinkable busbar sleeves for insulation and phase identification in power distribution panels.

Spiral Sleeve

Polyethylene spiral wrapping bands for neat cable bundling and protection against abrasion.

TIE PAD

Tie mounts and sticking saddles for cable tie routing and management inside electrical panels.

Tie Mount (Sticking Saddle)

Self-adhesive and screw-type tie mounts for cable tie routing and management inside panels.

SOLAR CONNECTOR

Solar MC4 connectors for photovoltaic system installations and solar panel wiring.

Solar MC4 Connector

MC4 solar connectors (male and female) for reliable photovoltaic panel wiring and solar installations.

ELECTRICAL INSULATION TAPE

Premium quality electrical insulation tapes for wiring, harnessing, and colour coding applications.

Electrical Insulation Tapes

Premium PVC electrical insulation tapes available in multiple colours for wiring and colour coding.

CABLE GLANDS

PVC and nylon cable glands for secure cable entry in wiring and control panel applications.

PVC Cable Glands

PVC cable glands for cost-effective cable entry and strain relief in light-duty enclosures.

Cable Glands

Standard cable glands for secure cable entry into electrical enclosures with strain relief.

HEAT SHRINK SLEEVE

Woer brand heat-shrinkable sleeves for electrical insulation, strain relief, and cable protection.

Heat Shrinkable Sleeve - Woer

Brand: Woer

Woer brand heat-shrinkable tubing for electrical insulation, strain relief, and environmental protection of connections.

END SEALING LUGS

Bootlace lugs (ferrules) for wire end termination and identification in switchgear and control panels.

End Sealing Lugs (Bootlace Lugs)

Insulated bootlace ferrules for wire end termination, available in DIN-coded colours for identification.

FERRULING MACHINE RIBBON

Hot stamping ribbons for ferruling machines used in wire marking and identification.

Ribbon For Ferruling Machine

Hot stamping ribbon cassettes for ferruling machines, used in printing identification marks on ferruling tubes.

BUSBAR SUPPORT

Finger type busbar supports for secure mounting and insulation of busbars in switchgear and distribution panels.

Finger Type Busbar Support

DMC/SMC finger type busbar supports for secure mounting and insulation of busbars in panel boards.

MCB CHANNEL

MCB DIN rail channels for mounting miniature circuit breakers and other rail-mounted components.

MCB Din Rail Channel

Standard TS35 DIN rail channels for mounting MCBs, terminal blocks, relays, and other panel components.

CRIMPING TOOLS

Cable lugs crimping tools for precise and reliable cable lug terminations in electrical installations.

Lugs Crimping Tools

Professional crimping tools for precise and reliable cable lug terminations, available in hydraulic and manual types.

PANEL LOCKS & KEYS

DC panel locks and keys for securing electrical enclosures and panel doors.

DC Panel Locks & Keys

Panel locks and keys for securing electrical enclosures, available in cam lock and quarter-turn configurations.

CABLE TIES

Cable wire zip ties for bundling and organizing cables in electrical and industrial applications.

Cable Wire Zip Ties

Nylon cable wire zip ties for secure bundling and organization of cables in various installations.

FOIL TAPE

Aluminium foil tape for EMI/RFI shielding, heat reflection, and HVAC duct sealing applications.

Aluminium Foil Tape

Dead-soft aluminium foil tape for EMI/RFI shielding, heat reflection, and HVAC duct sealing applications.

GASKET

U-shape rubber gaskets for edge protection and sealing in electrical panels and enclosures.

U Shape Rubber Gasket

U-shaped rubber gaskets for edge protection, sealing, and vibration dampening in panels and enclosures.

INSULATORS

Busbar insulators for insulating and supporting busbars in power distribution and switchgear systems.

Busbar Insulators

DMC and SMC busbar insulators for secure insulation and support of busbars in distribution panels.

POLYESTER TAPE

Polyester film tapes with excellent electrical insulation properties for transformers, motors, and coil wrapping.

Polyester Tapes

High-tensile polyester film tapes with excellent electrical insulation properties for transformers and motors.
